PAUL MALTSEV

San Francisco, CA
Email: maltsevp@gmail.com

TECHNICAL SKILLS

- Javascript (React, Backbone, Stimulus)
- Ruby / Rails
- Python
- C++

PROFESSIONAL EXPERIENCE

January 2016 - July 2016 [Westfield Labs](#) - Front End

- Designed and built a Javascript library for westfield.com which provides a simple interface to gather complicated analytics and send them to Google Analytics. This improved the developers' experience when adding new pages and/or analytics to the website.
- Worked on the client side of Westfield.com Accounts. Built the auth and shopping transaction systems.

October 2014 - October 2015 [Zenti](#) - Full Stack

- Training Tool: Designed & built from the ground up a Ruby on Rails app used internally to strengthen the classification algorithm. The user can create classifiers, pull tweets and manually classify them (via API calls to the back-end). The training app was an essential internal tool for lead generation.
- Was responsible for the front-end of all internal and client facing apps.

January 2014 - August 2014 [Propane](#) - Front End

- Built the front end layout of large scale websites for: Ocean Mist, Grocery Outlet, Blurb, Kaiser Permanente
- Built a [Store Locator](#) in Backbone.js utilizing GroceryOutlet's and Google Location APIs.

EDU
2020 - B.S. in Applied Mathematics from U.C. Davis (w/ minor in CS).
